## ANTIGEN PREPARATION

A synthetic peptide derived from C-terminus of human Caspase 13 protein. This sequence is identical to human rat and mouse species

## BACKGROUND

Caspases belong to the cysteine-aspartic acid protease (Caspase) family which plays a major role in the transduction of the apoptotic signal and execution of apoptosis in mammalian cells.

#### PURIFICATION

The Rabbit IgG is purified by Epitope Affinity Purification

## FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

#### SPECIFICITY

This antibody reacts with caspase 13 in human, mice and rat

#### STORAGE

The antibodies are stable for 24 months from date of receipt when stored at -20oC to -70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.
