

Ab^{Max} Large-Scale Antibody Production in vivo (Cat# 60013)
Ab^{Max} Large-Scale Antibody Production in vitro (Cat# 60014)

(Monoclonal antibodies can be produced in vitro or in vivo. AbboMax provides small or large scales antibody production at your request)

The package includes the following items:

- ❖ Free consultation of antibody production at your project needs
- ❖ Cell line maintenance and expansion
- ❖ Antibody (acites or T. C. Super) collection and pre-treatment
- ❖ Antibody purification, protein concentration and ELISA validation
- ❖ ELISA data analysis, isotyping confirmation, antibody spectrum, SDS-PAGE
- ❖ Western blot (Optional); Dot blot (Optional)

The data will be provided with the project:

- ❖ Project process
- ❖ Certificate of antibody characterization
- ❖ ELISA analytical data

Timetable

- ❖ Cell expansion: 1 week
- ❖ Antibody production/antibody purification: 3 weeks

Standard Operation Protocol:

Each standard operation protocol (SOP) will be prepared by AbboMax according to your project request prior the project is initiated.

Note: Please e-mail us if you have any questions: info@abbomax.com.
