### ANTIGEN PREPARATION

A synthetic peptide of human c-erbB2/Her2 protein.

### BACKGROUND

Oncoprotein Her-2/Neu/ c-erbB-2 belongs to one of the four members of the ErbB receptor family. They are transmembrane receptor-like tyrosine kinases which can be autophosphorylated without ligand binding process when it is overexpressed in breast cancers. Her2 is an important biomarker in breast cancer diagnosis. The antibodies/ heregulin can suppress phosphorylation of HER2 on tyrosine Y1248. Endogenous anti-HER2 antibodies can effectively suppress HER2 kinase activity and downstream signaling to inhibit the transformed phenotype of HER2-expressing tumor cells. Thus, anti-Her2 antibodies have been used widely in the treatment of the breast cancer and other carcinomas.

### PURIFICATION

The Rabbit IgG is purified by Epitope Affinity Purification

### FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

### SPECIFICITY

This antibody recognizes human c-erbB-2. The other species not tested.

### STORAGE

The antibodies are stable for 24 months from date of receipt when stored at -20oC to -70oC. The antibodies can be stored at 2oC-8oC for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.
