ANTIGEN PREPARATION

A synthetic peptide SR AFA DRS NLR AHL QTH corresponding to human SNAI protein. It is identical to human, mice and rat.

BACKGROUND

Snail (SNAI) is a zinc finger transcriptional repressor which downregulates the expression of ectodermal genes within the mesoderm. This proteins regulate transcription and include the mammalian proteins SLUG, SNAI 1, the human homolog of Drosophila SNAIL, and Smuc. SNAI 1 and SLUG are expressed in placenta and adult heart, liver, and skeletal muscle. SNAI 1, and the corresponding mouse homolog Sna, each contain three classic zinc fingers and one atypical zinc finger. Genetic variants in SNAI and TWIST are associated with breast and ovarian cancers.

PURIFICATION

The Rabbit IgG is purified by Epitope Affinity Purification

FORMULATION

This affinity purified antibody is supplied in sterile Phosphatebuffered saline (pH7.2) containing antibody stabilizer

SPECIFICITY

This antibody recognizes human SNAIL-1, 2, 3 protein. It cross reacts to human, mice and rat.

STORAGE

The antibodies are stable for 24 months from date of receipt when stored at -20°C to -70°C . The antibodies can be stored at 2°C - 8°C for three month without detectable loss of activity. Avoid repeated freezing-thawing cycles.
